

MTA TIG START 300 inline

Universal TIG box which will connect onto constant current dc stick welding power sources to give excellent Tig welding performance. Runs off the arc voltage so only welding cables are required. Used on an inverter, engine driven welder generator or conventional rectifier type power sources it will weld stainless steel, mild steel, and copper etc. This Tig box fits DC MMA power sources

Standard functions / features

- Electronic HF to start the welding arc.
- Torch trigger normal and latching functions.
- 3/8 BSP gas and power connection to take standard tig torches.
- Gas post flow to give a good finish without contamination to welds.
- Heavy duty inbuilt contactor to start and stop the welding arc.
- Works with mma power sources from 45 volts to 110 volts dc output.
- Built in gas flow meter
- Other functions are available including ammeter, etc if required.

Technical specification

- Welding current range (depending on power source)
5A – 300A
- Duty cycle - 210A60% 300A/30%
- Welding OCV range - 45 V – 110V DC
- Size - 210 x 370 x 300mm H
- Weight - approx. 10 kg

Price Beat!
